OZ MARITIME

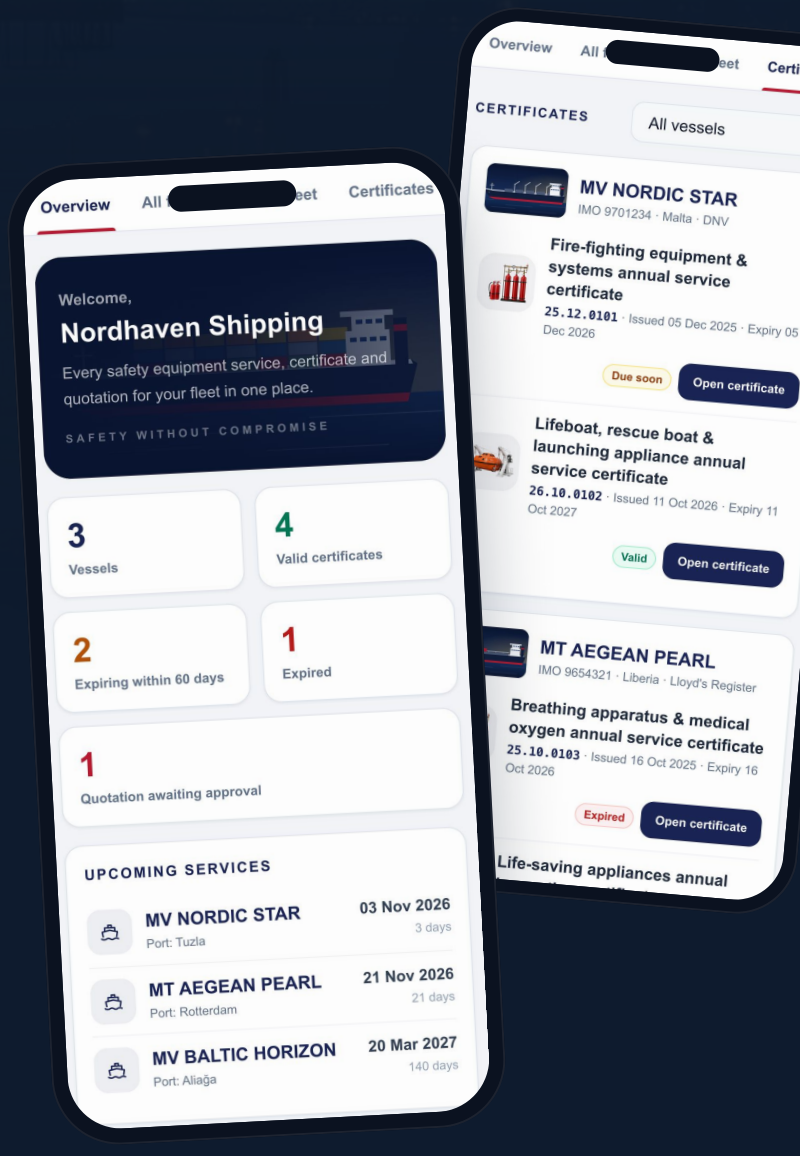

FINN BY OZ MARITIME · CUSTOMER PORTAL

Every certificate. Every ship. One screen.

Finn by OZ Maritime is our customer portal. Expiry dates for the whole fleet, every job on board, quotations, invoices and inspection documents, in one place, on the office screen and on the bridge.

YOUR FLEET TODAY — Nordhaven Shipping · 3 vessels

MV NORDIC STAR	Fire-fighting equipment & systems annual service	Valid
MT AEGEAN PEARL	Life-saving appliances annual inspection	Due in 25 days
MT AEGEAN PEARL	Breathing apparatus & medical oxygen	Expired

app.ozmaritime.com
For the office, the ship, purchasing and HSQE

SAFETY WITHOUT COMPROMISE

WHAT CHANGES FOR YOUR FLEET

The answers your team chases by e-mail, already in the portal

Expiry dates, attendance times, findings, quotations, invoices and inspection documents. Each person sees what their job needs: the superintendent, the master, purchasing and HSQE.

Never miss an expiry

One calendar for every certificate and service date across the fleet, with reminders before anything runs out.

- Fleet calendar: overdue, due within 60 days, valid
- Reminders 90, 60, 30, 14, 7 and 1 day before, in the app and by e-mail
- Dates appear in Outlook, Google or iPhone calendar

See every job as it happens

Know who is coming on board, when the work is done and what was found, without chasing anyone.

- Technician attendance: day and time, and any change
- Service completed notice with a short summary
- Critical findings reported at once, not with the final report

Request to invoice, without the e-mail chain

Ask for a quotation in one tap, approve it with your PO number and keep every invoice in view.

- Quotation request in one tap, or let Finn build the list from your old certificates
- Approve online with your PO number; revisions show exactly what changed
- Repeat last year's order for the same or another vessel

Made for the ship, not only the office

The master and officers get their own vessel's file on a phone, and it keeps working at sea.

- Weekly and monthly LSA-FFE checks on a phone, with a dated record
- Defect report with a photo, straight to the vessel's OZ Maritime contact
- Next ports and ETA, so we plan the service around your route

Ready when the inspector boards

Genuine certificates that can be checked in seconds, and the supporting documents to hand.

- A QR code on every certificate proves it is genuine
- Inspection pack: current certificates and latest reports in one PDF
- Send a PSC or vetting deficiency report, see which items we can close and when

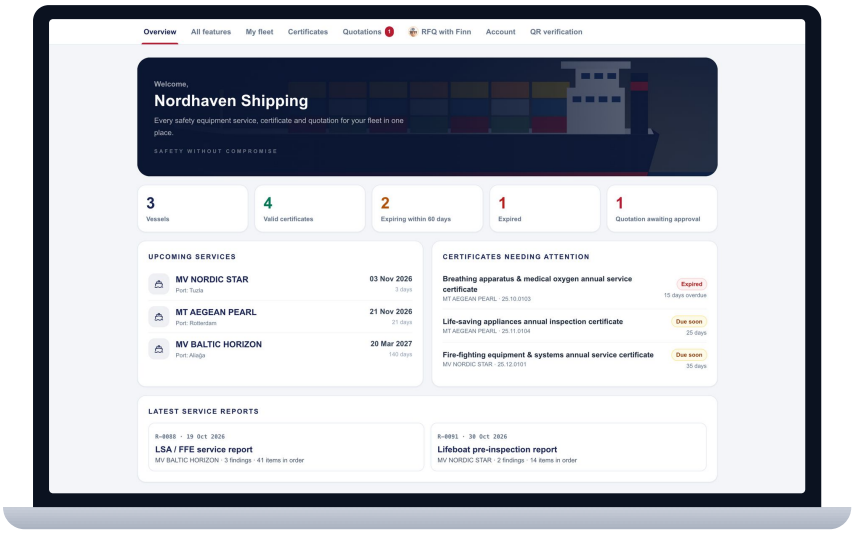

Your company, your rules

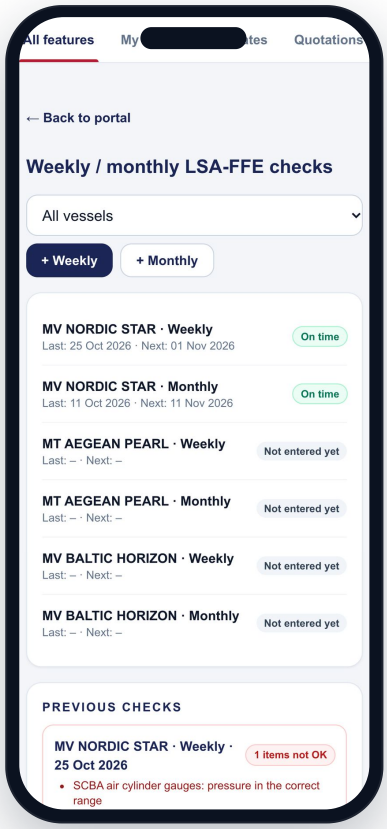

You decide who sees which ship. Your data stays yours.

- Office, ship and administrator roles; choose who sees which vessel
- Two-step sign-in for portal administrators and ship users
- Your company sees only its own vessels and documents

ONE PORTAL, TWO PLACES

From the office to the bridge

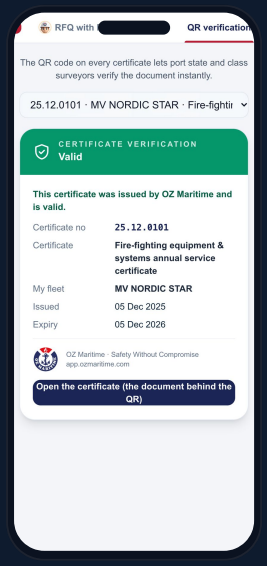

In the office

- The fleet calendar shows what is overdue and what falls due in the next 60 days.
- Quotations are approved online with your PO number; a revision lists what changed.
- Invoices show paid, due and overdue, and download as one file.
- A monthly fleet summary arrives by e-mail.

On board

- Weekly and monthly LSA-FFE checks on a phone.
- A defect with a photo reaches us at once.
- Works at sea without internet.
- One button to our 24/7 duty team.

WHEN THE INSPECTOR BOARDS

Proof in seconds, documents to hand

Every OZ Maritime certificate carries a QR code. The inspector scans it and sees that the certificate is genuine, with its number, vessel and dates. Before a PSC, vetting or class inspection we can put the current certificates and latest service reports into one inspection pack. After an inspection, send the deficiency list and see which items we can close, and when.

YOUR COMPANY, YOUR RULES

Secure by design

Your portal administrator decides who sees which vessel: office users, ship users and administrators. Our side follows the same discipline.

Your data only
Each company sees only its own vessels, documents and users. The lock sits on the server and in the database.

Two-step sign-in
Portal administrators and ship users cannot open the portal without two-step verification.

Nothing sent by itself
Photos, notices, packs and summaries prepared by OZ Maritime reach you only after the vessel's OZ Maritime contact approves them. A share can be withdrawn.

Private files
Uploads are checked (PDF and images only, size limit) and kept in private storage. Downloads use links that expire within minutes.

GETTING STARTED

1. **Tell us who**
   Names, roles and the vessels each person should see.
2. **We open the accounts**
   Office, ship and administrator accounts, with two-step sign-in.
3. **Short walkthrough**
   A short online session with your office and, if you wish, the masters.

ASK FOR A DEMO

See your own fleet in the portal in 15 minutes

We show it on a phone and a laptop, with sample vessels or with yours.
