OZ MARITIME

OZ DIGITAL · CUSTOMER PORTAL

# Your fleet's safety paperwork, in one place.

Built in-house by OZ Maritime and live for every client. From the first quotation to the final certificate, everything about your vessels happens in one portal that you, your superintendents and your surveyors can check.

### Live tracking

Quotation, work order, progress photos and delivery, stage by stage.

### Item-by-item approval

Approve a quotation fully or partially, item by item, with notes. The revised PDF is issued at once.

### QR-sealed documents

Reports, certificates and invoices carry a QR seal any surveyor can check against our records.

### Digital archive

A folder per vessel, kept for the service life of the equipment. Download any document, any time.

### Expiry guardian

Certificate and service due dates tracked fleet-wide, with alerts before the window.

### Notifications

New quotation, report or delivery note: your team knows when we publish it.

**No extra software, no licence fee.** Log in from a laptop or a phone at app.ozmaritime.com. Access is per person, so the office sees the whole fleet and a vessel sees only itself. Ask your coordinator to open the accounts.

HOW IT WORKS

# From enquiry to certificate, on one screen.

1

## Request

Send the enquiry from the portal or by e-mail; the quotation appears in the vessel folder.

2

## Approve

Approve all or part of it; the work order is issued to the team.

3

## Follow

Progress photos and notes appear while the team is on board.

4

## Receive

Signed report, certificates and invoice, QR-sealed, filed per vessel.

5

## Plan

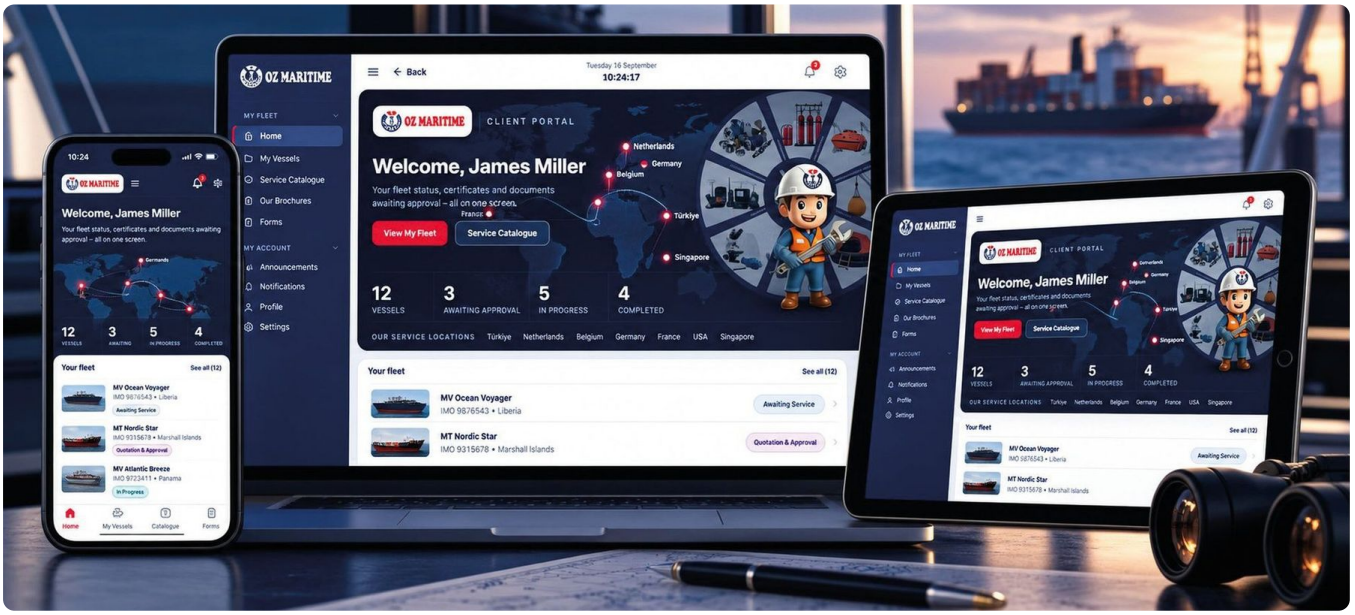

Next due dates carried forward and flagged before the window.

**FOR SURVEYORS AND PSC**

Scan the QR seal on any OZ Maritime report or certificate. The verification page shows the document as issued, so a copy that has been altered is obvious.

**GETTING ACCESS**

Ask your OZ Maritime coordinator. We open the accounts for your office and vessels and link your existing documents to the right folders.

ORDERING GUIDE

# Planning a port call with OZ Maritime.

Six things, and the quotation comes back complete.

**01**
### Vessel
Name, IMO number, flag, class society, vessel type.

**02**
### Port and dates
Port, berth or anchorage, ETA, ETB and ETD. Shipyard name for yard periods.

**03**
### Agent
Agent name and contact, for gate passes, boat service and delivery.

**04**
### Equipment
Equipment list, makes and models, serial numbers where you have them.

**05**
### Due dates
Copies of the last certificates or the planned maintenance extract.

**06**
### Scope
What is due: annual, five-yearly, repair, supply, or all of it.

**SERVICE ENQUIRIES**

**info@ozmaritime.com**

Türkiye +90 216 591 07 39
Europe +31 164 313 000

**SUPPLY REQUISITIONS**

IMPA codes where you have them. Through ShipServ:

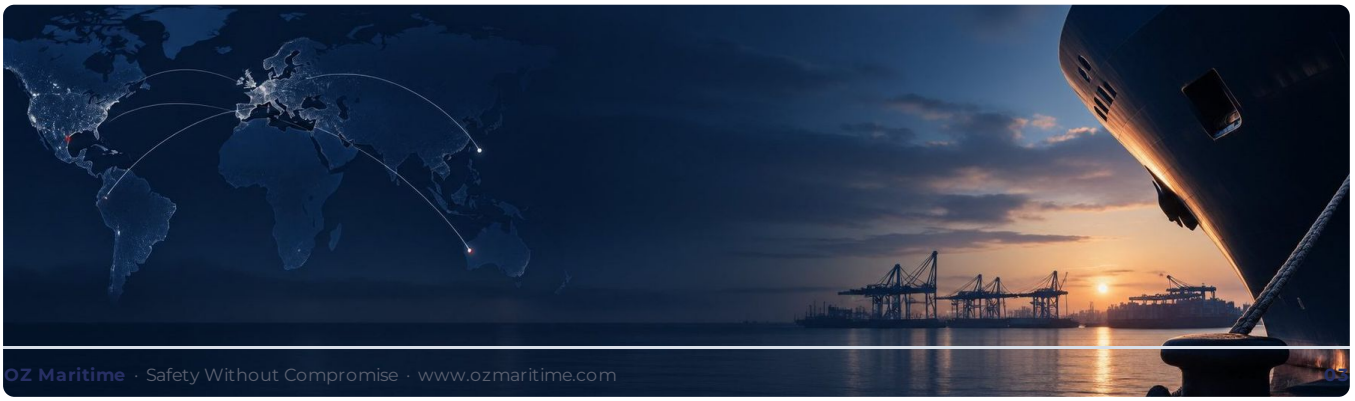

**Türkiye 251537 · Europe 311839**

**EMERGENCY · 24/7**

**+31 6 24 11 76 73**

Phone and WhatsApp

**Short notice?** Send what you have. Vessel, port and dates are enough for us to hold a team; the rest can follow.

WHAT HAPPENS NEXT

# From enquiry to follow-up.

1

## Enquiry

Received and acknowledged. Anything missing is asked for at once, not at the gangway.

2

## Quotation

Written, itemised, with the scope, the team and the mobilisation time. Approve in the portal or by e-mail.

3

## Preparation

Gate passes and boat service through the agent; spares, exchange rafts and test equipment loaded.

4

## Attendance

Our engineers on board. Findings that change the scope are reported before the work, not on the invoice.

5

## Documents

Signed report, photographs and certificates, QR-sealed, in the portal; originals on board.

6

## Follow-up

Next due dates carried forward and flagged before the window.

### ON BOARD, PLEASE HAVE READY

- Access to the equipment and the spaces it is in
- The responsible officer for sign-off and countersignature
- Maintenance manuals and previous service records
- Deck power and fresh or sea water for load tests
- Permit to work where the vessel's SMS requires one

### EQUIPMENT LANDED FOR SERVICE

Liferafts, cylinders and instruments taken ashore are logged, photographed and returned with their certificates. Exchange units can be fitted before yours leave the vessel.
