

SERVICE LINE 04

Liferaft & LSA

Approved liferaft stations, HRU renewal, exchange rafts, loose LSA.

WHAT WE DO

Annual servicing of inflatable liferafts at our approved service stations, exchange liferafts so the vessel does not wait, and inspection of every other life-saving appliance under the LSA Code.

WHY IT IS REQUIRED

SOLAS Chapter III Regulation 20.8 requires every inflatable liferaft to be serviced at intervals not exceeding 12 months at an approved servicing station competent to service them, in accordance with Resolution A.761(18) as amended by MSC.55(66) and MSC.1/Circ.1328. Hydrostatic release units are replaced by their expiry date. Lifejackets, immersion suits and other LSA are inspected under the LSA Code and the vessel's maintenance schedule.

QUESTIONS WE ARE ASKED

How often must a liferaft be serviced?

At intervals not exceeding 12 months at an approved station, per SOLAS III/20.8. Some administrations permit an extension to 17 months in defined circumstances; we confirm against your flag before the raft is landed.

Can the vessel sail while its rafts are being serviced?

Yes, with an exchange raft of the same type and capacity, certified and ready, fitted before yours is landed.
